

Accounting & Finance for Entrepreneurs: 1 Day Workshop

OVERVIEW

This course explains the essential concepts of accounting and finance to business owners and managers who do not have a financial background.

Knowing how to finance assets, forecast future cash flows, maintain a budget, determine which operations are profit generators and which are not, and judge the real economic merits of different investment opportunities will help you stay in business and turn a profit.

The course will explain what you need to know to be an intelligent consumer of financial information, to plan, and to use financial concepts in making better business decisions.

Calculating and assessing the overall financial health of your business is an important part of an owners or managers position. This course provides the fundamentals of financial literacy and gives you the smart advice you need to increase your impact on financial planning, budgeting and forecasting.
